

## Food & Supply Source

Food and Supply Source is the human service sector's premier and concierge level procurement solution. We are your one-stop shopping experience. Our network of pre-vetted suppliers affords your organization with a comfort level of doing business with the best in that industry.

We audit the suppliers in our network to ensure that they are providing our customers with the best customer service experience possible. We aggregate the volume of all our clients together and present this to our supplier community to bid on the sum total of the entire Food & Supply Sourcez portfolio. It is truly a community effort, as one organization is helping another to save significant amounts of money on the products and services they need to run efficiently.

We have 10,000+ Product Lines, Produce, and Dairy. We utilize local and national distributors to obtain low costs. Coupled with our NutriSource program, we will save you 10-35% off your food costs (in many cases)
